- Date / Time / Plate / Offence Search Tools

**Overview :-** RE-CAP Data Manager is an event review and reporting system for use with plettac Security UK Ltd's range of ANPR systems. RE-CAP can provide Incident reports in the form of text documents or graphical format. By using a simple user interface ensures less mistakes are made saving time & money. The Data Manager is a complete solution for dealing with Multimedia events.

**Details :-** The ability to automatically import or gather data should this be picture / video / Text or a combination, a new event is created within the database. The database has a number of fields some completed automatically (by captured information) & some for user input. Where ever possible information is filled automatically to reduce user error. The package comes complete with picture enhancement tools, these only change the view image, therefore the user cannot tamper with the evidence.

*Invert the Video Image*

*Magnify area of the Image*

# RE – CAP Data Manager ANPR System

**Tools :- RE-CAP** comes with tools to highlight regions of interest, these may be used in offence documents, images generated by RECON –ANPR, areas can be magnified or modified to invert the picture to aid identification, the result is any offence notice can carry the captured image and also a magnified section highlighting the vehicles number plate.

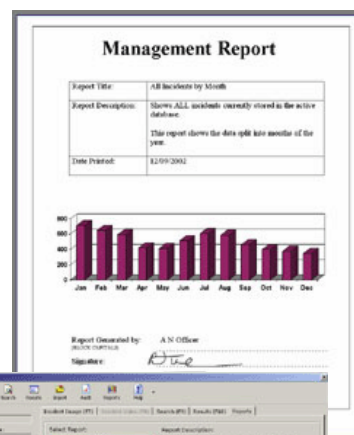

This type of use can also aid identification of person driving the vehicle.

**Reports :- RE-CAP** uses its relational database to provide a history of processed events, allowing the operator to produce graphical reports. The report formats can be customised to the end user requirements.

**Database :-** As the information grows the need to search the database becomes more time consuming, therefore **RE-CAP** includes a search engine allowing events to be searched using date / time / type of events / number plate details etc. The search screen can be customised to the most relevant searches required by providing single click buttons. To ensure no evidence has been tampered with, a full audit trail is provided.

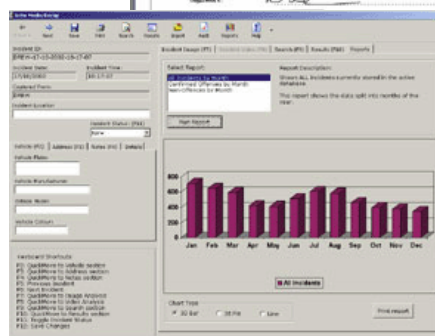

Example of Offence Notice
