

RE – Con Trip ANPR System

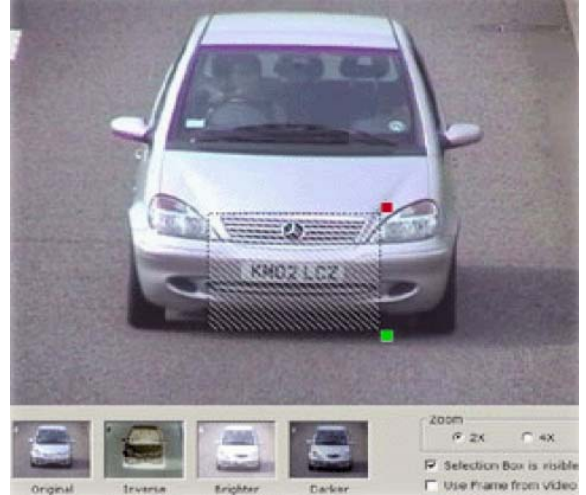

- Trigger From External devices
- Trigger Visual Motion Detection
- Remote or Local Information Access
- Storage of Triggered Video Sequence / Images
- Transmission of Triggered Video / Images
- Performs Under All Lighting & Weather Conditions
- Perform Automatic Responses

e.g. Barrier Opening

Email

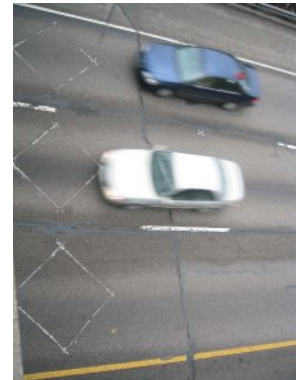

SMS Text Messaging

Image Transmission

Overview :- RE-CON Trip performs the services of data collection & is fully supported by RECAP Data Manager. This allows the captured data to be imported for full review & further action.

Details :- The system provides accurate automatic capture of ANPR /LPR to both local & remote sites. Triggered events can be produced the form of data files, images or video footage. Data can be transferred in real time or at a specific time to RE-CAP Data Manager. Using either single trigger or multiple trigger devices to capture the required information, the system can be integrated to access control systems as well. Various scenario's can be facilitated, e.g. vehicle approaches with access tag, one image taken, vehicle approaches without access tag, recorded video is started & images taken & emailed to Security Manager. The RE-CON Trip system can be configured to work with most types of sensor and perform customised actions.

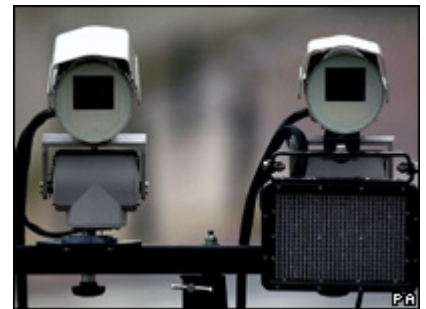

RE – Con Trip ANPR System

RE-CON TRIP as with all plettac ANPR systems uses the Phoenix based front end application, making all systems user friendly & easy to operate.

Remote Operation :- Should direct communications fail between roadside unit and control room, then there is options available of Bluetooth & Wi-Fi connection, allowing an engineer to integrate a system without the need to leave his vehicle. Data Can also be transferred to a laptop PC in the same way, thus reducing downtime and the need to carry spare HDD units.

Applications for RE-CON Trip

- Intruder Monitoring
- No Left / Right Turn
- One Way Traffic enforcement
- Restricted Entrance Monitoring
- ATM Monitoring
- Red Light Enforcement
- Access Control
- Speed Camera
- Traffic Surveys
- Airport Security
- Guest Notification

Other Products & Services

- CCTV Cameras
- Digital Recording Systems
- Biometric Access Control
- Access Control
- Pre-build & FAT Testing
- System Design
- IR Illumination
- Rapid Deployment Systems
- System Integration
- Fibre Optic Transmission Systems
