- No Additional Hardware Required

The **SentiO – REVIEW** is a software only solution to connect to any **SentiO** recorder / Server over a LAN. The software runs on the reliable Windows 2000 / XP platform. **SentiO – REVIEW** searches & finds and **SentiO** unit on the LAN automatically connects & displays any camera connected recorder / server. To keep network traffic to a minimum the **REVIEW** software requests the images to be compressed. The compression allows the **REVIEW** software to archive display speed of 25 ips over 100Mbps Ethernet.

Connectivity : **REVIEW Lite** can connect to a single server or **Pro** connects to any number of servers on the network & display up to 16 cameras, The **Pro** Version can also configure servers on the network.

REVIEW Functionality :- Server Access from **REVIEW** is password authenticated, only users with the correct privileges may change server configuration. Configuration changes take effect straight away without the need to reset the Server.

Alarms :- **REVIEW** can Receive alarms from servers connected to the LAN, Alarms and VMD activations can be acknowledged remotely.

PTZ Cameras :- These can be controlled using the on screen Menu.

Playback : **SentiO – REVIEW** can playback up to 16 different recorded video streams simultaneously from any **SentiO** Recorder / server on the same LAN. A number of different display formats allow viewing of recorded video at different resolutions. Playback has simple controls in line with most VCR's for ease of use, Video can be playback at up to 8x times normal speed.

Recorded Video :- Can be Searched using specific time periods using date & time or VMD alarms.

Video Export :- **SentiO – REVIEW** can receive video from any connect server and then export clips to CDRW, DVDRW or other devices. The video player may be exported together with the images. Exported video can be viewed on any PC with windows98, NT,2000 or XP operating systems, without any additional hardware or software.

Image Authentication :- **SentiO – REVIEW** can check image integrity, images that are tampered with do not display date & time during playback indicating failed authentication, This benefit is also available on exported images.

SentiO- REVIEW Network Review & Play Back Software

Variants

REVIEW PRO :- is a fully featured network view & playback software. It can connect multiple servers and configure any connected machine. Video clips may be exported to recordable Media formats in the remote unit. It can also remotely control cameras using it's network PTZ Controller Software

REVIEW LITE :- Connects o a single **SentiO** recorder on the network & allows the user to view live video from the remote server, also allowing the display of playback images over the network

System Specifications :- requires minimum 800Mhz P111 with 128Mb RAM & Windows 2000 / XP operating system.
